

**NAME**

**auth** - irccd auth plugin

**DESCRIPTION**

The plugin **auth** provides generic authentication to the most popular services.

For the moment, **auth** supports the following backends:

nickserv        the NickServ service, using /msg NickServ identify user pass

quakenet        the quakenet.org service, using /msg Q@CServe.quakenet.org AUTH user pass

**INSTALLATION**

The plugin **auth** is distributed with irccd. To enable it add the following to your plugins section:

```
[plugins]
auth = ""
```

**USAGE**

You must configure the file to enable authentication.

**CONFIGURATION**

In your irccd.conf file, add the *[plugin.auth]* section and fill with the following parameters:

*server.type* (string)        must be *nickserv* or *quakenet*.

*server.password* (string)    the password.

*server.username* (string)    the username to use. Required for quakenet, optional for nickserv.

Note: you must replace server with one defined in a *[server]* section.

Example of configuration:

```
[plugin.auth]
freenode.type = "nickserv"
freenode.password = "mysecretpassword"
freenode.username = "jeanfrancois"

wanadoo.type = "nickserv"
```

```
wanadoo.password = "wanadoo is dead"
```
