NAME

    Irccd.Chrono - irccd chrono API

SYNOPSIS

    Irccd.Chrono();

    Irccd.Chrono.prototype.elapsed

    Irccd.Chrono.prototype.reset();

DESCRIPTION

    This module keeps track of elapsed time.

METHODS

    The **Irccd.Chrono**() constructor function creates a chrono object at the current time.

    When constructed successfully, the object has the following properties:

        elapsed (int)   Return the number of milliseconds since creation or last call to

    The **Irccd.Chrono.prototype.reset**() method starts or restarts accumulating time.
