

NAME

auth - irccd auth plugin

DESCRIPTION

The plugin **auth** provides generic authentication to the most popular services.

For the moment, **auth** supports the following backends:

nickserv	the NickServ service, using /msg NickServ identify user pass
quakenet	the quakenet.org service, using /msg Q@CServe.quakenet.org AUTH user pass

INSTALLATION

The plugin **auth** is distributed with irccd. To enable it add the following to your plugins section:

```
[plugins]
auth = ""
```

USAGE

You must configure the file to enable authentication.

CONFIGURATION

In your irccd.conf file, add the *[plugin.auth]* section and fill with the following parameters:

<i>server.type</i> (string)	must be <i>nickserv</i> or <i>quakenet</i> .
<i>server.password</i> (string)	the password.
<i>server.username</i> (string)	the username to use. Required for quakenet, optional for nickserv.

Note: you must replace server with one defined in a *[server]* section.

Example of configuration:

```
[plugin.auth]
freenode.type = "nickserv"
freenode.password = "mysecretpassword"
freenode.username = "jeanfrancois"

wanadoo.type = "nickserv"
```

```
wanadoo.password = "wanadoo is dead"
```
