

**NAME**

**roulette** - irccd roulette plugin

**DESCRIPTION**

The **roulette** plugin is a funny script that let you do a russian roulette game but without any injuries.

Note: the bot will perform a kick command if the user is being shot so you must be sure to have channel operator mode set on irccd.

**INSTALLATION**

The plugin **roulette** is distributed with irccd. To enable it add the following to your plugins section:

```
[plugins]
roulette = ""
```

**USAGE**

The **roulette** plugin simply reacts to the special command.

```
markand: !roulette
ircdd: markand, you're lucky this time
markand: !roulette
ircdd: markand, you're lucky this time
markand: !roulette
markand was kicked by ircdd [markand, HEADSHOT]
```

**TEMPLATES**

The **roulette** plugin supports the following templates in *[templates.hangman]* section:

*lucky*      The text to show on luck. Keywords: *count* (the number of turns left in the cylinder).

*shot*        The text to show on shot.

All templates support the following standard keywords: *channel*, *command*, *nickname*, *origin*, *plugin*, *server*.

**EXAMPLES**

Example of configuration file:

```
[templates.roulette]
lucky = "#{nickname} you're gonna get shot"
```

shot = "BIM"
