

NAME

buf_init - initialize a buffer

SYNOPSIS

```
#include <buf.h>
```

void

```
buf_init(struct buf *b);
```

DESCRIPTION

The **buf_init**() function is used to reset the buffer specified by *b*.

It does not allocate anything and it can even be unneeded if you have zero'ed the object yourself.

SEE ALSO

libbuf(3), buf_finish(3)

AUTHORS

The **libbuf** library was written by David Demelier <markand@malikania.fr>
