

NAME

imgup - simple image hosting service client

SYNOPSIS

imgup [-Dpv] [-a *author*] [-d *duration*] [-t *title*] *filename host*

DESCRIPTION

The **imgup** tool is the convenient brother to **imgupd**, it will upload an image into an instance.

The *filename* argument must point to an image and the *host* argument is a URL where a **imgupd** instance is running.

Available options:

- D** List all supported durations.
- p** Store the image as public (default is private).
- v** Be more verbose.
- a *author***
Sets the author, defaults to "Anonymous".
- d *duration***
Sets the paste lifetime, defaults to "day".
- t *title*** Sets a title to the paste, defaults to "Untitled".

EXAMPLES

Upload the image background.png with a title and an author.

```
imgup -t "Nice background" -a Francis background.sh http://example.org
```

Paste a short duration image.

```
imgup -p -d hour secret.png http://example.org
```

AUTHORS

imgup was written by David Demelier <markand@malikania.fr>
